

ABOUT UREA STORAGE

Suppliers and manufacturers of Urea storage and dispensing solutions.

We manufacture and supply a wide range of urea storage and dispensing solutions suitable for agricultural and commercial applications.

If you need to store urea safely, then look no further than our bunded urea storage tanks. These are made from high quality MDPE which is weather and impact resistant.

We also manufacture and supply urea dispensers, available from 210 litres to 5000 litres. These are available in both plastic and 2.5mm mild steel. They each come with either a 12V/24V or 230V pump, 4m delivery house with an automatic or manual nozzle and optional battery and flowmeter.

MOBILE STEEL UREA DISPENSERS

Safely dispense urea anywhere with our Ecosure bunded mobile steel dispensers. The 2.5mm high quality mild steel outer bund provides strength, whilst the baffled plastic inner tank is essential for the safe transportation and storage of urea.

Fully forkliftable, lifting eyes also provided for easy manoeuvring.

Ecosure mobile steel dispensers come with

- 4.5" inspection cap
- 2" BSP fill connection complete with cap and chain as standard
- internal bund drain point
- float gauge for continuous level monitoring
- self-priming pump (maximum flow rate of 35 l/min)
- manual nozzle
- 4m delivery hose

Optional extras

- auto nozzle
- longer dispensing hose
- high level alarm / Anti-theft alarm
- electronic level gauge
- battery power source
- TODO dry break fill point
- flowmeter
- brackets for bolting to base
